Wild Fowl

How oft against the sunset sky a moon
I've watched the zigzag of spread wings
In unforgetten autumns gone too soon
In unforgetten springs

Creatures of disdation, far they fly
Above all lands bound by the curling foam
In misty fens, cold moors and tumbled sky
These wild things have their names.

They know the Tundra of Siberian Coast,
And tropic marshes by the Indian Seas
They know the clouds & mists & starry hosts
From Crux to Pleiades

Dark flying come against the western sky
It tells the sweep & loneliness of things
Symbol of Autumn vanished long ago,
Symbol of coming springs
Pa-Ta - Shun

To a Water Fowl Bryant

All day thy wings have fanned
At that far height, the cold thin atmosphere
Yet stoop not weary to the welcome land
Tho the dark night is near.

And soon thy toil shall end
Soon shalt thou find a secure home & nest
And secure among thy fellows
Reeds shall bend
Soon O'er thy sheltered nest.

He who from zone to zone
Guides through the boundless sky
Thy certain flight
In the long way that I must
Tread alone shalt lead
my steps aright.
